## Professional Summary

---

DevOps and Cloud Engineer with 5+ years building and operating AWS infrastructure, automated delivery pipelines, containerized platforms, and production services. Operated 100+ Docker and Kubernetes workloads at 99.95% uptime and automated CI/CD for 40+ AWS applications. Complementary experience in software development, API integration, and business process automation includes 100+ APIs and 40+ applications. Combines hands-on engineering with a Master of Computer Science, MBA, and Computer Engineering foundation to connect platform decisions with measurable business outcomes.

## Selected Impact

---

- Sustained **99.95% uptime** across 100+ business-critical Docker and Kubernetes workloads through standardized delivery, observability, and troubleshooting practices.
- Reduced deployment failures **30%** and release cycles **20%** by automating CI/CD for 40+ AWS applications.
- Delivered 100+ APIs and system integrations, improving cross-platform data throughput **40%**.
- Automated approximately **30%** of manual workflows, saving 20+ hours per week per department.

## Professional Experience

---

### Solera Holdings

Oct 2022 – Present

*Software Configuration Management Engineer I*

*Remote, Mexico City, Mexico*

- Deploy, operate, and troubleshoot 100+ business-critical workloads using **Docker and Kubernetes**, contributing to 99.95% availability.
- Build and optimize secure CI/CD pipelines for 40+ AWS applications using **Jenkins, GitLab CI, and Terraform**, reducing deployment failures 30% and release cycles 20%.
- Standardize reproducible AWS infrastructure with **Terraform and CloudFormation** across globally distributed application and engineering teams.
- Use **Datadog, Grafana, and Zabbix** metrics, dashboards, and alerts to investigate service behaviour, diagnose production issues, and guide resolution.
- Strengthen GDPR-aligned platforms through IAM optimization, vulnerability scanning, and secrets management.

### Huawei

Oct 2020 – Sep 2022

*IT Solutions & Product Manager Jr / Full Stack Developer / Internship*

*Mexico City, Mexico*

- Analyzed stakeholder workflows and translated product and operational requirements into 100+ APIs, integrations, and 40+ web applications.
- Improved cross-platform data throughput 40% through reliable APIs and system integrations.
- Automated approximately 30% of manual workflows with **Python, Bash, and Selenium**, saving 20+ hours per week per department.
- Collaborated across business, product, and engineering teams to deliver practical software solutions; recognized as **Best Intern**, “**Top Minds Mexico**” in 2021.

## Core Engineering Capabilities

---

- **Cloud Infrastructure & IaC:** AWS, Terraform, CloudFormation, secure access, and repeatable provisioning.
- **CI/CD & Reliability:** automated delivery, containers, observability, troubleshooting, and safer releases.
- **Automation & Integration:** n8n, Python, APIs, webhooks, PostgreSQL, validation, and traceability.
- **Applied AI & ML:** evaluation-driven workflows designed around quality controls and human oversight.

## Selected Engineering Projects

---

### Business AI Automation Hub

*GitHub Portfolio*

TypeScript, n8n, Docker, PostgreSQL, REST APIs, JSON Schema, Vitest

- Designed a modular business automation platform with typed services, n8n workflows, API and webhook integrations, PostgreSQL persistence, and structured data contracts.
- Implemented validation, test tooling, webhook verification, structured logging, and human-approval gates for safer and traceable operations, with explicit boundaries for future LLM integrations.

### Sustainable Telecom Churn & E-Waste Analytics

*GitHub Portfolio*

Python, scikit-learn, XGBoost, SMOTE, GridSearchCV, MLP

- Built a repeatable machine learning workflow for preprocessing, training, cross-validated tuning, threshold optimization, and evaluation across Logistic Regression, SVM, XGBoost, and MLP.
- Improved Logistic Regression to **80.62% accuracy** and **0.61 churn recall**, then connected model results to a sustainability analysis of telecom e-waste.

### Hybrid Cloud Monitoring & Automation Platform

*Conestoga Capstone, 2025*

AWS, Terraform, Docker, Python, Grafana

- Designed a hybrid cloud platform combining Infrastructure as Code, Python automation, automated alerting, and visualization dashboards.
- Recognized by faculty for innovation and technical robustness.

## Technical Expertise

---

**Cloud & Platforms:** AWS (EC2, S3, IAM, VPC, Lambda, CDK), Google Cloud foundations, Kubernetes, Docker, cloud-native operations

**Infrastructure & Delivery:** Terraform, CloudFormation, Ansible, Jenkins, GitLab CI, GitHub Actions, CI/CD, Git, Nexus

**Software & Integration:** Python, TypeScript, JavaScript, Bash, Groovy, SQL, PostgreSQL, REST APIs, webhooks, JSON Schema

**Automation & AI:** n8n, Selenium, workflow orchestration, validation, human-in-the-loop controls, structured logging, test tooling

**Machine Learning & Data:** scikit-learn, Logistic Regression, SVM, XGBoost, MLP, SMOTE, GridSearchCV, preprocessing, model evaluation, threshold tuning

**Reliability & Security:** Datadog, Grafana, Zabbix, monitoring, alerting, troubleshooting, IAM, vulnerability scanning, secrets management

**Business & Delivery:** product management, requirements analysis, process improvement, solution design, stakeholder communication, Agile/Scrum

## Education

---

### Algoma University

*Master of Computer Science*

Brampton, ON

*Sep 2025 – Aug 2026*

### Autonomous Technological Institute of Mexico (ITAM)

*Master of Business Administration (MBA) / WES Evaluated*

Mexico City, Mexico

*Jan 2023 – Jul 2024*

### Conestoga College

*Ontario College Graduate Certificate, Virtualization & Cloud Computing*

Waterloo, ON

*Sep 2024 – Apr 2025*

### Universidad Nacional Autónoma de México (UNAM)

*Bachelor of Computer Engineering / WES Evaluated*

Mexico City, Mexico

*Jan 2016 – Jan 2021*

## Credentials & Recognition

---

**Certifications in Progress:** AWS Certified Solutions Architect – Associate; HashiCorp Terraform Associate

**Google Cloud Skill Badges, Feb 2025:** Set Up an App Dev Environment on Google Cloud; Set Up a Google Cloud Network

**Recognition:** Best Intern, “Top Minds Mexico,” Huawei, 2021
