PROFESSIONAL EXPERIENCE

Solera Holdings

Software Configuration Management Engineer I

October 2022 — Present
Remote · Mexico City, Mexico

- Deployed, operated, and troubleshooted 100+ business-critical Docker and Kubernetes workloads while contributing to 99.95% uptime.
- Automated CI/CD pipelines for 40+ AWS applications using Jenkins, GitLab CI, Terraform, and related delivery tooling.
- Reduced deployment failures by 30% and shortened release cycles by 20% through repeatable delivery practices.
- Implemented Infrastructure as Code with Terraform and CloudFormation, standardizing AWS environments across global application and engineering teams.
- Used Datadog, Grafana, and Zabbix for monitoring, alerting, troubleshooting, and operational visibility.
- Supported IAM optimization, vulnerability scanning, secrets management, and GDPR-aligned engineering practices.

Huawei

IT Solutions & Product Manager Jr · Full Stack Developer · Intern

October 2020 — September 2022
Mexico City, Mexico

- Analyzed stakeholder workflows and translated business and technical requirements into working software.
- Developed 100+ APIs and system integrations, improving cross-platform data throughput by 40%.
- Developed 40+ web applications using JavaScript technologies.
- Automated approximately 30% of manual workflows with Python, Bash, and Selenium.
- Saved 20+ hours per week per department through automation.
- Received the “Best Intern, Top Minds Mexico” recognition in 2021.

All metrics describe documented past professional results and are not projections or guarantees for future engagements.

SELECTED WORK

APPLIED MACHINE LEARNING · 2025

Sustainable Telecom Churn & E-Waste ML

End-to-end workflow covering preprocessing, class imbalance, four-model comparison, cross-validated tuning, threshold optimization, and sustainability analysis.

80.62% optimized Logistic Regression accuracy · 0.61 churn recall

[View public repository](#)

BUSINESS AUTOMATION ARCHITECTURE

Business AI Automation Hub

Modular TypeScript and n8n platform with validation, webhook verification, JSON Schema contracts, structured logging, test tooling, and human approval gates.

Future LLM-ready boundaries; no production LLM integration claimed

CONESTOGA COLLEGE CAPSTONE · 2025

Hybrid Cloud Monitoring & Automation Platform

Hybrid monitoring and automation design combining AWS, Terraform, Docker, Python, alerting, and Grafana dashboards.

Recognized by faculty for innovation and technical robustness

EDUCATION

Master of Computer Science

Algoma University · Brampton, Ontario

September 2025 — August 2026 · Expected August 2026

Master of Business Administration, MBA

Autonomous Technological Institute of Mexico, ITAM

January 2023 — July 2024 · WES Evaluated

Graduate Certificate — Virtualization & Cloud Computing

Conestoga College · Waterloo, Ontario

September 2024 — April 2025

Bachelor of Computer Engineering

National Autonomous University of Mexico, UNAM

January 2016 — January 2021 · WES Evaluated

CREDENTIALS

AWS Certified Solutions Architect — Associate

Amazon Web Services

IN PROGRESS

HashiCorp Certified: Terraform Associate

HashiCorp

IN PROGRESS

Set Up an App Dev Environment on Google Cloud

Google Cloud Skill Badge · Feb 14, 2025

Set Up a Google Cloud Network

Google Cloud Skill Badge · Feb 14, 2025

TECHNICAL TOOLKIT

Cloud & Platforms: AWS, EC2, S3, IAM, VPC, Lambda, Kubernetes, Docker

Infrastructure & Delivery: Terraform, CloudFormation, Ansible, Jenkins, GitLab CI, GitHub Actions

Programming & Data: Python, TypeScript, JavaScript, Bash, Groovy, SQL, PostgreSQL

Automation & APIs: n8n, Selenium, REST APIs, webhooks, JSON Schema, Vitest

Monitoring: Datadog, Grafana, Zabbix, alerting, troubleshooting, operational visibility

Business & Product: requirements analysis, process improvement, product management, stakeholder engagement
